## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 20-64 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present application relates to rescaling data. More specifically, the present invention provides techniques for determining reduction ratios for modifying transform coefficients associated with an input data sequence. The various prior art of record fail to anticipate or render obviousness a method for altering transform coefficients associated with macroblocks in a frame having a frame size and a target reduction ratio, the method comprising: identifying a number of input bits and a number of output bits associated with a set of processed macroblocks, having altered transform coefficients; generating an updated reduction ratio using the number of input bits and the number of output bits associated with the set of processed macroblocks; and altering transform coefficients of the next macroblock using the updated reduction ratio to allow attainment of the target reduction ratio used to rescale data in encoding process.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
